Professor Gleb Wataghin
University of Sao Paulo
Faculty of Philosophy,
Science and Letters
Sao Paulo, Brazil

Dear Professor Wataghin:

Thank you for your kind letter of June 22.

We should be very glad to have your assistant, Dr. Paulus Pompeia spend as much time as he cares to in our laboratory during the coming year. If, as I understand it, he already has a Ph.D. degree or its equivalent, he would be eligible to attend classes as a guest of our laboratory. We should try also to enable him to do some laboratory work in collaboration with one of our experimenters if he is here long enough to make profitable.

Your acquaintances here in Chicago frequently recall the interesting conversations that we had together when you were here last winter.

With best personal regards,

Yours very truly,

Arthur H. Compton
