

São Paulo (Brasil), 17 de Agosto de 1940.

Dear Dr. Pompeia

I was very glad to hear you did want to go to the United States and get training in technical and scientific subjects.

I do remember your very brilliant course in Physics in the Faculdade de Filosofia, Ciências e Letras and I have followed with deep attention your scientific and didactic activities in the Faculty.

I am sure that your knowledge of Physics and Electrotecnics, together with your experimental craft, widely demonstrated in two years of researches on cosmic rays, in which I had the pleasure of having your collaboration, give the assurance that your stay in the United States will be very useful for widening your knowledge and being more useful for your country.

You are authorized to make of this letter the use you want.

Yours, sincerely

Dr. Paulus Aulus Pompeia  
Lecturer of Physics in the Section of Chemistry  
Faculdade de Filosofia, Ciências e Letras  
University of S. Paulo.
