Av. Brig. Luiz Antonio, 784.

São Paulo, 2 September 1942.

Prof. Arthur H. Compton
Ryerson Physical Laboratory
Chicago.

Dear sir:

I received, only to day, the notification from April 4th of my election to fellow of A.A.A.S. To have been distinguished by such an honour makes me very grateful to you and the other members of the council and I hope to be lucky enough to deserve it and to be able to cooperate with all of you in your work in behalf of science.

We are beginning to do some defense work and we all feel happy about it. Of course our research has been slowed down.

We expect to get some support from the Rockefeller Foundation. The Foundation and the Government of S. Paulo agreed in a common grant to our Laboratory.

Pompeia has just arrived to Rio and will probably be here in a couple of days.

Sincerely yours,
