Dear Professor Compton:

The Rockefeller Foundation has invited Dr. Marcello D. de Souza Santos and myself to visit the U. S. and spend there about three months studying and getting in touch with colleagues and friends.

It is really a wonderful opportunity. I hope very much to be able to discuss some of our recent work on cosmic rays and some theoretical problem, and especially to have the privilege to discuss them with you. I imagine how busy you are, and I know that perhaps it will be impossible, but I still hope that during our trip we shall have the opportunity to meet you. We are flying from Rio October 18<sup>th</sup>.

Please remember me to Mrs. Compton and to your sons.

Yours very sincerely,

Prof. Arthur H. Compton  
President of the  
Washington - University  
S. Louis, Missouri.  
U. S. A.
