

April, 2nd, 1948

Dear Dr. Miller,

I am sending herewith copies of my letter and Mr. Heins and from his answer concerning 20 Geiger tubes which Dr. Maze (co-worker of Auger) made for us. I suggested in a recent letter to Maze that he should send the 10 counters directly from Paris instead of bringing them to New York. If by any chance you get in touch with him, I should be grateful to you for any advise you could give to him.

I guess you are already informed about the discovery made by Cesar Lattes and Gardner in Berkeley (see New York Times, March 9, Life, March 22 and Science, March 12).

Best wishes for your journey and many thanks

Yours sincerely

Gleb Wataghin

Dr. Harry M. Miller
