Philadelphia, Pennsylvania.

Dear Sirs,

During my recent visit to your office in Philadelphia , I was informed that you could deliver Geiger- Muller counters for cosmic rays researches, and I received from DR. Wagenseller also the catalogues of your apparatus. During my trip I lost these catalogues, so that in ordering 20 Geiger Counter tubes I shall specify the type without reference to your catalogues.

I should be grateful if you could send to this Department of Physics 20 Geiger-Muller Counters of the so called "self-quenching " or "fast" type and of the following approximate dimensions:

12 counters for cosmic ray research, of the useful area of about 100 cm.^2 (2 inches diameter x 10 inches length) of the selfquenching type specified in your catalogue.

6 counters of smaller dimensions (about 1 inch diameter x 3 inches length) also for cosmic rays work.

2 counters of slow type (argon & oxigen) of the same dimensions of the 12 abovementioned counters (approximately of 100 cm.^2 of useful area)

In view of the need we have to receive these counters for our current researches as soon as possible , I should be obliged if you could send them by Air Mail by American Air Express C^o and charge all the expences and the order of payment to this Department, sending the documents by Air Mail to a Bank in S. Paulo. We shall pay to the Bank immediately. If you prefer another way of payment let us know. We could send the money in advance. The adress should be: Departamento de Fisica, Universidade de S. Paulo, 78 Av. Brig. Luiz Antonio, São Paulo , Brazil.

With best thanks
very sincerely

Gleb Wataghin
