# DO YOU READ THE GENERAL RADIO EXPERIMENTER?

In addition to the catalogs describing the standard line of instruments it manufactures, the General Radio Company publishes a monthly magazine, the **GENERAL RADIO EXPERIMENTER**, for free distribution among interested persons. It contains technical and semi-technical engineering articles which are contributed, for the most part, by members of the General Radio engineering staff. Since the choice of subjects is inevitably conditioned by the trend of new developments, those who are already users of General Radio instruments should be particularly interested in receiving the publication.

The **GENERAL RADIO EXPERIMENTER** is sent without charge to scientists, engineers, and others professionally interested in communication-frequency measurements. To be placed on the mailing list, fill out and mail the attached card. Please be sure to mention your position or the type of work you are doing.
