São Paulo, November 18, 1957.

Dear Professor Hittmair:

I received your letter from Bariloche and am sorry the Austrian authorities are not willing to let you stay with us for a year. Our representatives in the Atomic Conference held recently in Viena have not returned yet so I don't know if they succeeded in arranging an extension of your leave of absence. I hope it will be so.

Quite independently of that we would like to have you with us for two or three months before you return to Austria. Since you mention April as the month for your return may be you could leave Argentina earlier — January or February and stay here for a short time. Our experimentalists would benefit from that. While you are here we could arrange things for the future.

Best regards

M. Sch.
